

Exquisite oils from nature

100% natural and certified
organic oils for body, mind and soul

My **BIO**LIO

About us

With the natural power of precious plant oils, we enhance quality of life in the balance of man and nature.

MyBIOLIO is a leading supplier of certified organic oils based in Switzerland.

We are producers of **fatty vegetable oils** and **essential oils**, which we extract from organic seeds. We use only selected, pristine oil seeds and kernels in the daily production of our exquisite oils. All the oils we produce are tested and certified.

We have made it our mission to develop and sustainably produce only 100% pure and unmixed organic oils of exquisite quality in a responsible way with nature.

Behind all our decisions is the idea that pure and unadulterated nature gives perfect balance and equilibrium. MyBIOLIO therefore treats the resources of our earth with care and respect.

Numerous international customers trust in the competence of MyBIOLIO. Our **main markets** include **Europe, America, Asia** and **Australia**.

I am fascinated by the wisdom and power of natural oils that plants give us. This enthusiasm for nature together with the needs and desires of people for their daily well-being have led me on this journey. In our daily lives we use a wide variety of oils, pure or integrated into other products – for example, to care for our bodies, to strengthen our immune system, for use on animals or even as a household aid.

It is a matter of the heart for me to bring effective oils untouched in highest quality to my customers and to be able to make my contribution for more quality of life and joy of life.

Sustainability

Sustainability is the basis of our work and requires us to act responsibly at all levels, which is why we have built our corporate mission statement entirely around this claim:

Our vision

To create a purely natural well-being for people for a far more sustainable and healthier everyday life.

Our mission

MyBIOLIO creates access for people to a wide variety of organic oils of the highest quality and purity through its wide range of products.

Our core values

Natural products

We guarantee 100% pure and unmixed organic oils that are tested and certified.

Sustainable action

We respect living ecosystems and use natural resources and energy sparingly.

Highest quality standard

We are very selective when it comes to raw materials. For the daily production of our exquisite oils, we use only selected, immaculate oil seeds, kernels and leaves.

Vegetable oils

For our products we use only natural plant substances, which we select and process with great care. Our precious raw materials draw their effective powers from the immeasurable wealth of the natural plant world and embody the full power of nature.

Our fatty **vegetable oils are cold-pressed virgin**. They are gently extracted from suitable and carefully treated **seeds, sprouts or fruits** in order to preserve all valuable ingredients, such as vitamins.

The fact that we produce our oils 100% pure, cold-pressed and in first pressing is not only due to our quality standards, but also has taste and nutritional reasons.

Cold pressing

In cold pressing, the partially crushed plant parts are pressed in a single operation without heating. Subsequently, the oils are merely filtered to obtain the pure oil.

No other process so gently extracts the delicious oil from the oleaginous fruits. During cold pressing, the valuable fatty substances are fully preserved and are expressed in the aroma, taste and color typical of the variety. Each raw material makes its own demands on the experience and intuition of our pressing masters.

Our customers are rewarded with pure oils that are unsurpassed in terms of originality and varietal characteristics.

We offer our organic oils in different sizes: from small bottles (see pictures below) to large IBC containers – prices on request.

APRICOT KERNEL OIL
(Prunus armeniaca)
CAS-No. 72869-69-3

AVOCADO OIL
(Persea americana)
CAS-No. 8024-32-6

PEANUT OIL
(Arachis hypogaea)
CAS-No. 8002-03-7

SAFFLOWER OIL
(Carthamus tinctorius)
CAS-No. 8001-23-8

FIG SEED OIL
(Ficus carica)
CAS-No. 90028-74-3

LINSEED OIL
(Linum usitatissimum)
CAS-No. 8001-26-1

MILK THISTLE OIL
(Silybum marianum)
CAS-No. 84604-20-6

POPPY OIL
(Papaver somniferum)
CAS-No. 84650-40-8

BLACK CUMIN OIL
(Nigella sativa)
CAS-No. 90064-32-7

MUSTARD OIL
(Brassica nigra)
CAS-No. 8007-40-7

POMEGRANATE SEED OIL
(Punica granatum)
CAS-No. 84961-57-9

ROSEHIP OIL
(Rosa canina)
CAS-No. 84696-47-9

COCONUT OIL
(Cocos nucifera)
CAS-No. 8001-31-8

PUMPKIN SEED OIL
(Cucurbita pepo)
CAS-No. 8016-49-7

CAMELINA OIL
(Camelina sativa)
CAS-No. 225233-97-6

SESAME OIL
(Sesamum indicum)
CAS-No. 8008-74-0

SWEET ALMOND OIL
(Prunus amygdalus)
CAS-No. 8007-69-0

GRAPE SEED OIL
(Vitis vinifera)
CAS-No. 8024-22-4

WALNUT OIL
(Juglans regia)
CAS-No. 8024-09-07

WHEAT GERM OIL
(Triticum vulgare)
CAS-No. 84012-44-2

Essential oils

Our precious essential oils come exclusively from the **leaves, flowers, seeds, fruits, branches** and **roots of plants**.

With care and plant knowledge, the harvest always takes place at the ideal time. Thus, we use the full plant power for holistic effect.

The essential oils are **100% natural**, i.e. genuine and are extracted directly from the original plant, natural and unadulterated. No synthetic or nature-identical additives are used.

We leave our essential oils in their original purity as it is extracted from the plant, as close to nature as possible.

Steam distillation

Our essential oils are produced by the method of steam distillation. We use this method because it yields exceptionally pure and clean products, allowing temperature-sensitive aromatics to be collected.

The plant material is carefully piled up in a so-called alambique and steam is added. This dissolves the oil droplets from the plant and carries them with it. In a cooled tube, the steam condenses with the essential oil and collects in a container called a Florentine pot. The essential oil, which is usually lighter and therefore floats on top, can be easily skimmed off. Distillation time, pressure and temperature affect the quality of the essential oil and require years of experience.

We offer our organic oils in different sizes: from small bottles (see pictures below) to large IBC containers – prices on request.

ANISE OIL
(Pimpinella anisum)
CAS-No. 8007-70-3

EUCALYPTUS OIL
(Eucalyptus globulus)
CAS-No. 8000-48-4

FENNEL OIL
(Foeniculum vulgare)
CAS-No. 8006-84-6

GINGER OIL
(Zingiber officinale)
CAS-No. 8007-08-7

PINE OIL
(Pinus sylvestris)
CAS-No. 8023-99-2

ROSE OIL
(Rosa damascena)
CAS-No. 8007-01-0

ROSEMARY OIL
(Rosmarinus officinalis)
CAS-No. 8000-25-7

SAGE OIL
(Salvia officinalis)
CAS-No. 8022-56-8

TEA TREE OIL
(Melaleuca alternifolia)
CAS-No. 68647-73-4

THYME OIL
(Thymus vulgaris)
CAS-No. 8007-46-3

LAVENDER OIL
(Lavandula intermedia)
CAS-No. 8022-15-9

LAUREL LEAF OIL
(Laurus nobilis)
CAS-No. 8002-41-3

MANDARIN OIL
(Citrus reticulata)
CAS-No. 8008-31-9

MINT OIL
(Mentha arvensis)
CAS-No. 68917-18-0

ORANGE PEEL OIL
(Citrus sinensis)
CAS-No. 8008-57-9

JUNIPER BERRY OIL
(Juniperus communis)
CAS-No. 8002-68-4

YLANG YLANG OIL
(Cananga odorata)
CAS-No. 8006-81-3

CEDARWOOD OIL
(Cedrus atlantica)
CAS-No. 8023-85-6

CINNAMON LEAF OIL
(Cinnamomum verum)
CAS-No. 8015-91-6

LEMON PEEL OIL
(Citrus limon)
CAS-No. 8008-56-8

Production and certification

The careful treatment of man and nature accompanies every step of the production of our products. By using gentle processes, we ensure that all the effective powers of the plants are preserved.

Our raw materials are extracted exclusively on site at our respective organic cultivation partners from the fresh plant parts, directly after they come from the field. Depending on the plant and raw material, we choose the most suitable and gentle method for extracting the purest oils.

The production capacity for **fatty vegetable oils** is **50 tons per month** and for **essential oils** **10 tons**. Our oil factory is located in Antalya, Turkey.

Certification

Our products are **Ecocert** certified. With 30 years of experience in auditing and certifying organic products in France, Germany and over 130 other countries, Ecocert is the world's leading specialist in certifying sustainable practices. Ecocert has an international network to monitor compliance with organic standards on the ground. The entire supply chain is audited, from raw material to finished product.

MyBIOLIO oils also have **USDA NOP certification**. Ecocert has certified our oils as organic products and attested to their compliance with the American NOP standard.

Furthermore, our products also have the **EU organic certification**. Ecocert has certified our oils as «organic» and «ecological» and attested conformity with the EU Organic Regulation.
